HYBRID ARRAY X90 V4

Large Night Club Optimized, High Efficiency 4-way Speaker System, Low Resonance MDF enclosure, loaded with Dual 15" High Output Low Frequency Transducers in short horn loaded configuration, quadruple 6.5" NEODYMIUM Mid-Range Transducers with Weatherizing Treatment, vertically arrayed in a centered sub enclosure, High Frequency TITANIUM diaphragm, NEODYMIUM 4" voice coil Compression Driver loaded on a 90° x 60° constant directivity horn and Dual Ultra High Frequency ring radiators. Adjustable captive rigging system assembly installed with grade 8 hardware. Black Textured Finish Color or also available in any custom color.

TECHNICAL DATA

Enclosure	Trapezoidal
Configuration	Nominal 4-Way Quad Amplified
Impedance	VHF 16 ohms HF 8 ohms, MF 8 ohms, LF 4 ohms
Freq. Range (-10dB)	30Hz to 22KHz
Coverage Pattern	90° x 60° or 60° x 40°
Components:	VHF, HF, MF, LF Dual 3/4" Ring Radiators, 4" Compression Driver, Quad 6.5, Dual 15" Transducers
Connectors	NL-8
Net Weight	325 LBS
Finish Color	Textured Finish Black
Grille/Protection	316L Stainless Steel
Warranty	60 Months Limited Commercial Warranty
Dimensions	56.5" H X 30" W X 26.5" D

WP WEATHER PROTECTED VERSION

- Constructed of Treated Exterior Composite wood panel, which is vermin, termite and mold resistant, without sounding like plastic or fiberglass.
- 316L Stainless Steel Grille for maximum corrosion resistance in the harshest environments.
- 1/4" acoustically transparent foam water stop layer.
- 100 micron 316L Stainless Steel Mesh for insect resistance in outdoor use within landscape environments.
- Weatherized component treatment for long term reliability.
- Watertight junction box for secure connections and vandal resistance on larger properties.
- All Stainless Steel Hardware for reliable, long term outdoor installation.
